

Invitation to R-22

  WWW.ROBOTICSEVENT.EU

Whether you're working in construction, manufacturing, agriculture & horticulture, energy, or healthcare, the Nordic countries' newest and largest fair in robotics, automation, and drones is a must-visit this spring.

R-22 at Odense Congress Center presents the latest robotics technology from the best-known manufacturers and most promising startups, with a high focus implementation: this is where you'll discover how automation has boosted the competitiveness and bottom line of both large and small companies in five distinct industries.

EXPERIENCE AT R-22

During the 3 days of R-22 you'll:

- **Explore the latest technology in robotics, automation, and drones**
- **Experience a wide array of concrete cases and success stories from Danish and Nordic companies**
- **Meet experts in implementation – benefit from automation from day one**
- **Participate in a rich conference programme with experts, entrepreneurs, producers, colleagues, and high-profile names from the robotics world**
- **... and much, much more**

At the fair you'll have plenty of opportunities to meet business owners from your specific line of work, who are already having great success with automation. A unique chance to discuss and exchange knowledge on how to take the first steps towards a stronger business through new technology.

In short: If your business or organization is in a field where robotics and drones are already on the rise, or you want to be among the first to reap the rewards of automation – you can't miss R-22 at Odense Congress Center from March 23-25, 2022.

We look forward to seeing you!
